Getting into the green era

It was quite a special year, including a fire in our warehouse which made us in the end stronger and gave us the possibility to change some ways of working. We were also able to visit all of our loyal suppliers last season, which resulted in the new collection for 2024. A collection which fit the coming trends and which we are very proud of.

Another pride which is worth to mention is our whole NDT International team which is strong, professional and stays consistent at all times. Always ready to develop, create, help and sell.

As the title already mentions, sustainability is on top of our mind. NDT is in a advanced stadium of sustainable thinking and working, and will work this out for the public in the coming year.

We see a lot of positive challenges which are lying ahead of us. We're ready, with our team and collection for coming season, sure you will join us together in this interesting era.

Light and Dazzling

Creating a garden to relax in and get zen again. Slowing down is clearly necessary in this fast-changing world. Look after yourself, look after each other, look after your living environment to ultimately create a better world. We create this by using colours that are soft and breathe harmony, consider soft neutrals and pastels.

Bold origin

Materials and products seem to come straight from nature. Long live the outdoors, where you are inspired by nature's design all throughout the day. It may be rough, as pure as nature made it and unpolished as it is. Be bold.
