PASIŪLYMAI JUMS

b2b.seklos.lt/en

b2b.seklos.lt/en is a new gardening goods shopping platform for agro-company "Sėklos" wholesale and export market partners all over the world!

In response to market changes and partners' desire to order goods quickly and conveniently, we hope that this new way of shopping will save all partners time and make it easier to find information about the goods of interest.

We follow traditions and especially value professionalism. The company employs experienced professionals who set the highest quality standards for products. They closely follow and dictate the latest gardening trends. So, on this platform you will find everything we offer to add to your assortment to sell too.

This shopping platform is constantly updated and improved. Here you will find:

- Products we design and manufacture and import.
- Prices individually assigned to you (visible only after registration), products and logistics information that will help in preparing optimized orders.
- News, promotions, product catalogues, and other necessary information for selling the offered products.
- You will also be able to track your shopping history, order status. Here you will find all the necessary accounting information in one place - in your account - at a time convenient for you.
- In addition, you will be able to download product photos and descriptions in several languages.

If you have any questions or need our assistance or consultations - you can always contact the manager assigned directly to you. You will find all the information in the contact section after successful registration.

We hope that this shopping platform will be quick and easy to understand and navigate, but there is always room for improvement. We would appreciate it if you would leave feedback after shopping, what you would like or suggest to improve, what were you missing, or what you searched for, but were not able to find.

SODOLENDAS (GARDENLAND) BY KAKÈ MAKÈ

The Kakè Makè brand has been successfully thriving in Lithuania for over a decade. The cheerful and friendly character of Kakè Makè, as well as the brand, has been loved by families raising children from the age of 9.

Kakè Makè products are very popular and encourage children in Lithuania and other countries to explore the world and themselves. That's why we have created a garden and gardening kit for kids called SODOLENDAS (GARDENLAND), which will encourage children to connect with nature, introduces them to various plants and vegetables, and allows to experience the joy of gardening and growing.

SODOLENDAS (GARDENLAND) KITS BY KAKÉ MAKÉ

A gardening kit for kids is a great way to start getting to know the world of plants. This kit contains everything children need to become interested in plants and fall in love with gardening. In this kit, kids can plant various seeds and watch how the plants grow. It also includes colourful pencils and labels so that children can decorate their garden and mark the plants. The Kaké Maké gardening kit is not only fun but also an educational tool that promotes children's creativity, responsibility, and understanding of the plant growth process.

ORGANIC SEEDS

The experience of recent years shows that the demand for organic seeds is growing every year. An increasing number of buyers grow organic vegetables and herbs, so this seed line is intended specifically for gardeners who are conscious of their health, surrounding environment, and flora. The range includes certified organic flower, herb, and vegetable varieties with excellent biological properties, sustainable and resistant to diseases and pests. "Organic Way" seeds are purchased only from certified organic farms, where the soil is fertilised with organic and natural mineral fertilizers, and plant-based products made from plants with pesticidal properties are used to control diseases and pests. In addition, the seeds are packaged in packages that are produced in a certified company that meets PEFC certification standards, making them suitable for recycling.

The seed packaging is very informative - it has a QR code with all relevant information.

"ORGANIC WAY" LINE CONSISTS OF:

- 110 vegetable and herb varieties and flower varieties.

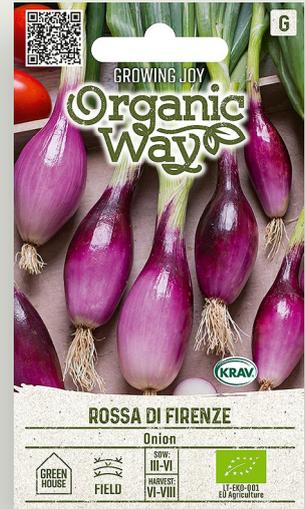

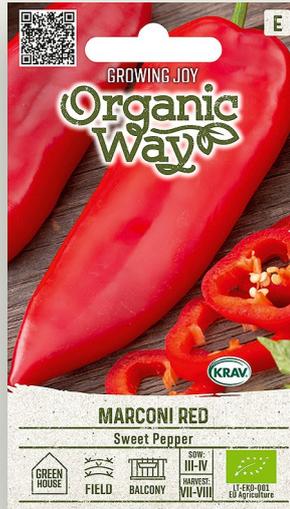

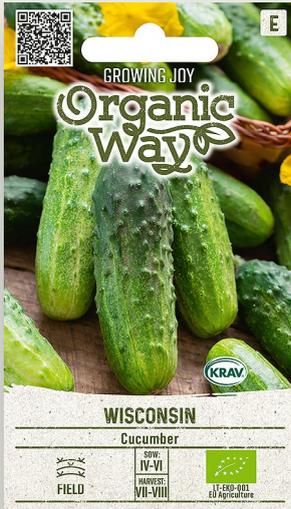

PRICE GROUPS:

5

LANGUAGES ON PACKAGING:

LT/LV/EE/EN/DK/NO/SE/PL

When forming the range, attention is paid to the varieties that have already been tested and are popular with the buyers.

CUCUMBER WISCONSIN

A medium-early, high-yielding variety. The fruit is green, nicely shaped and eaten fresh. Cultivated outdoors and under cover. Cucumbers are recommended to be planted in the same place after 2–3 years. This variety is suitable for both fresh consumption and canning.

SWEET PEPPER MARCONI RED

Medium-early variety. Vigorous plants, 45–60 cm tall. Fruits are large, juicy, long (6 cm x 17 cm), with 7–8 mm thick walls. Suitable for fresh use and canning. Cultivated in a greenhouse or outdoors.

TOMATO BEEFSTEAK

It is a medium-early, high-rise (indeterminate) tomato variety that produces fruits weighing 300 to 400 grams. This tomato variety will appeal to those who enjoy tasty, sweet fruits. Such tomatoes are ideal for making salads or preserving.

ONION ROSSA DI FIRENZE

Mid-early variety, with a vegetation period of 80 days. Leaves are crispy, dark green, the stem ends with a small oval, pink mild tasting root. Suitable for fresh use, particularly tasty when grilled. Resistant to low temperatures and draughts.

VEGETABLE, FLOWER AND HERB SEEDS

The most important advantages of the "Lucia Elite" line are product quality and focus on novelties on the market. It is intended for passionate gardeners looking for interesting and exclusive vegetables, herbs, and flowers. The uniqueness of this line is the large packaging (110 x 160 mm). Inside the packaging, there is also a distinctive feature, i.e. a label that helps gardeners or flower growers to mark the place of sowing and remember the name of the variety throughout the growing season. The seeds of the "Lucia Elite" line are safe, untreated with chemicals, suitable for sowing both in open ground and on windowsills.

THE LINE IS DIVIDED INTO 4 CATEGORIES:

- **"1 m² Garden"**: for gardeners with small gardening area. The plants in the range are easy to grow and stand out for their ornamental nature;
- **"Balcony & Terrace"**: plants in this category can be grown in pots, balcony trays;
- **"Tasty & Fresh"**: vegetable varieties favoured by gardeners, standing out for their taste characteristics;
- **"Quick & Easy"**: various seed tapes helping the gardeners to easily and quickly sow seeds.

"LUCIA ELITE" LINE CONSISTS OF:

- 64 vegetable and herb varieties;
- 21 flower varieties.

Every day we search for interesting and unique plant varieties. We'll help you create your own green oasis: in a balcony, in a conservatory, or in a garden as small as just 1 m².

NEW

TOMATO VERANDA RED H

VERANDA tomatoes, grown in small 2-litre pots, produce about 75 small but delicious tomatoes per plant. It's an easy-to-care-for, disease-resistant dwarf plant.

RUCOLA

For a real green oasis, sow fast-growing rucola in trays. The seeds of this lettuce sown in strips so that the plants germinate at regular intervals and the harvest can be harvested both in spring and when the weather cools down in the second half of summer.

SWEET PEPPERS YALA & RELA

Small-fruit sweet peppers go well with tomatoes. Bright yellow and red peppers with a juicy, mild flavour, can also be grown in pots and have a long fruiting season.

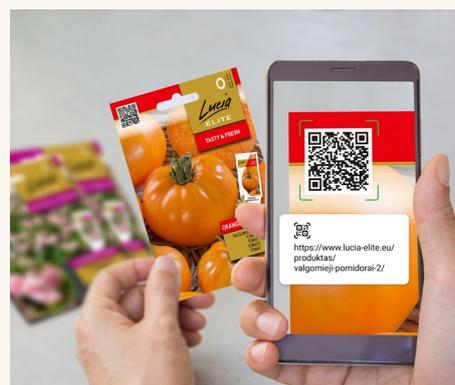

COLOCHA SCARLET

There is no beauty without flowers. Coleus adds subtlety and uniqueness to any corner of greenery. These fast-growing flowers with their distinctive leaf shape and colour look great in pots of all sizes, combine well with other flowers and create beautiful arrangements.

NEW

QR codes on the seed packaging

By scanning the QR code with a smartphone or tablet, gardeners can quickly access detailed information about the seeds. This is a convenient way to obtain planting instructions, recommended growing conditions, optimal harvest time, and even gardening tips and tricks.

A line with deep traditions, loved and appreciated by the buyers. The range includes professionally selected and time-tested varieties, tried-and-tested by the buyers in their gardens. Furthermore, buyers will like them because they are easy to grow. The selected varieties correspond with the price-quality ratio. "Agronom" is for all growers of vegetables, herbs, and flowers. For the convenience of buyers, detailed easy to read and understand information is provided on the packaging. Based on this information, the varieties can be divided into five collections.

"BEE FRIENDLY"

Includes varieties that will attract butterflies and bees to your garden. These little helpers will help you grow organic vegetables and flowers.

"MAXI"

Includes vegetables and flowers producing large fruits and flowers. The varieties in the collection stand out not only for their size, but also for their excellent taste and colours.

"MINI"

It will be of interest to gardeners, who grow vegetables, herbs, and flowers in small areas. The varieties in the range of this collection will produce an excellent harvest when grown in 1 m beds, balconies, terraces.

"EASY GROWING"

Easy to grow vegetables and flowers will be of interest not only to the beginners, but also to the experienced gardeners. All the vegetables and flowers in the collection can be sown directly into the soil and produce a high yield in a short period of time.

THE LINE IS DIVIDED INTO 2 GROUPS:

- 93 vegetables,
- 63 flower
- 14 herb varieties.

When forming the range, attention is paid to the varieties that have already been tested and are popular with the buyers.

NEW

SORREL BROADLEAVED

Perennial, one of the earliest leafy vegetables. Takes 45–50 days after germination to the first harvest. Can grow in any type of soil. Can grow in the shade. Sown in early spring or in the second half of summer.

LEMON GRASS

Perennial aromatic spice plants. Leaves and stalks are used for food, they contain the essential lemon oil, and the scent of the plant is stronger than that of lemon. Thrives best in fertile, moist, but not waterlogged soil.

CHIVES MEDIUM LEAF

Perennial, resistant to frost, hardly, easy to grow. Begins to yield early in spring. Mild garlic flavoured leaves are used for food. Decorative plants, look beautiful when grown in flower beds, pots.

CONEFLOWER

Perennial, 70–80 cm tall, low-maintenance, decorative, fragrant, and attracting many bees and butterflies. Flowers are 9–10 cm in diameter, colourful. Planted in flowerbeds, gardens, harvested for bouquets. Thrives well in lighter soil.

AGRONOM VEGETABLE AND MICROGREENS SEEDS IN BOXES

We have expanded the Agronom seed range with new popular varieties of vegetables and flowers, which are available in larger quantities and conveniently packaged in cardboard boxes. When creating the range, we focused on the tested and reliable varieties that are loved by customers. Larger quantities of seeds at an affordable price should appeal to experienced gardeners who cultivate larger vegetable and flower plots.

NEW

GROWING KIT **BASIL ITALIANO CLASSICO**

An early, tall variety. Vegetation period 75-80 days. Medium sized, juicy, tasty fruits. Cultivated outdoors and in the greenhouse.

GROWING KIT **TOMATO TINY TIM**

The pot-growing kit will provide the opportunity to enjoy fresh tomatoes. 'Tiny Tim' tomatoes are compact, low-growing plants that can be grown in pots year-round. They produce many small and delicious tomatoes.

GROWING KIT **PEPPERMINT**

The pot-growing kit will allow you to enjoy fresh peppermint all year round. It is a popular herb with a fresh mint-like aroma and a delicious taste. It complements a wide variety of dishes, from teas to desserts.

GROWING KIT **HOT PEPPER DE CAYENNE**

The pot-growing kit will give you the opportunity to enjoy chilli peppers. The 'De Cayenne' variety of chilli pepper is compact and highly decorative. The fruits are red and have a spicy flavour. Used as a spice.

GROWING KIT **OREGANO**

The pot-growing kit will allow you to enjoy fresh oregano all year round. These are medicinal, aromatic, decorative, and honey plants. Fresh and dried leaves enhance the flavour of meat, egg, fish dishes, salads, and soups.

A line adapted to the markets of the Baltic States, offering a wide range and exclusive varieties, created according to the needs of customers taking into account the novelties on the market. The new packaging design is easier to see and notice on the shelves, and the information is structured and informative. The line consists of almost 600 varieties for both professionals and amateurs. Most of the range is packed in airtight packaging. Such packaging extends the shelf life of the seeds by several years. The range is divided into 15 price groups: the seeds in the lowest and medium price groups should satisfy the needs of amateur gardeners, and the seeds in the higher and highest price groups stand out for their disease resistance, yield, and uniqueness. In addition, the range is divided according to the time of sowing and allows selecting plants according to the season.

THE LINE IS DIVIDED INTO 5 GROUPS:

- **"Premium"**: varieties with particularly high purity indicators, disease resistance;
- **"Top Selling"** – top selling varieties appreciated by the buyers;
- **Outdoor**: varieties the seeds of which are sown in open ground or under covers; the group consists of easy to grow, fast growing, and compatible vegetables, and flowers for summer and perennial flower gardens;
- **Greenhouse**: long-growing vegetable and flower varieties sown in January-March outdoors or in greenhouses;
- **Balcony**: flower and vegetable varieties, which are recommended to be grown in standing, hanging pots, and which are suitable for winter gardens and balconies.
- **Bee friendly** - plants to attract bees and butterflies.

NEW

GHERKIN ALPAKA H

Self-pollinated, highly resistant to powdery mildew and cucumber mosaic virus, an early and fast-growing hybrid suitable for growing cucumbers. Grown outdoors, under covers, or in greenhouses. It produces abundant and uniform crops, with a large proportion of crop being small cucumbers. The fruits are compactly clustered, firm, with small seeds, excellent taste and aroma, and not prone to overgrowth.

TOMATO LACITRINE H

Early, tall, 'Beef' type tomato hybrid. The plants are vigorously growing, highly productive, and disease-resistant. Fruits are flat-round, strongly ribbed, bright yellow with green stripes, weighing about 240–260 g. When fully ripe, they acquire an amber colour. They are of very good taste, sweet, aromatic.

WATERMELON MIRSINI H

This is a variety with a creeping stem. One plant produces about 7–10 small, decorative pumpkins. Fruits are round, flat and ribbed with orange skin and weigh 150-350 g. They can be used not only as a decoration but also for cooking – they can be stewed, fried or stuffed. For earlier harvest, grow from seedlings.

CONEFLOWER PARADISO SUPER-DUPER

Perennials, very decorative, with semi-full blooms, grow to a height of up to 80 cm. Blooms in the first year after sowing. It grows well in lighter soil well fertilised soil with organic fertilisers, in a sunny place or in semi-shade, does not like waterlogged soil. It is planted in green areas, flower bed and used for bouquets.

SUNFLOWER BIG SMILE

Annual 15–50 cm flowers. The variety can be grown in pots. The plant does not develop side branches. Grow best in fertile soil, protected from wind. Suitable for open areas, flowers are cut for bouquets. Sunflower can be cultivated in rural homesteads; they are suitable at the fences.

NEW

WILDFLOWER MEADOW MIXES

New and ornamental wildflower meadow mixes were added to the Agronom range. These are special seed mixes consisting of wildflower and lawn seeds. A meadow grown from this mix will be low-maintenance, and you will be able to mow it once the flowering has finished. Plants specially selected for these mixes flower throughout the warm season and attract bees, butterflies, and other insects to the homestead. 15-35 different types of flowers dominate in each mix.

Wildflower meadows are easy-to-grow and are perfect for landscaping slopes or places with less walking activity.

THE RANGE OF WILDFLOWER MEADOWS CONSISTS OF 6 DIFFERENT FLOWER AND GRASS SEED MIXES:

- Honey Fallow
- Universal Flowers From Nature
- Flowery Countryside
- Fallow Flowers
- Fallow Perennial Flowers
- Flowers For Bees & Co

LAWN SEEDS

The Agronom range includes all the main types of lawn, i.e. sports, universal, and decorative, as well as a mix for lawn reseeding. The mixes are composed only from seeds grown and patented in Denmark and/or Germany. The composition is chosen so as to achieve the best result without looking for the cheapest option. Due to a very handy lightweight packaging, the mixes in this line will be of interest to those buyers who are looking for seeds for small areas. These mixes are usually chosen by those who want a quick solution to a problem of an empty space.

NEW

SPORT LAWN GRASS MIX PROFESSIONAL DECORATIVE/SPORTS MIXTURE!

Recommended to use for all soil types. Grass seed mixture with mycorrhizal additive. Mycorrhizal fungi in lawn grasses stimulate faster root and shoot growth, which means faster turfing of lawn areas. The turf becomes denser and more compact, resulting in a 'carpet' of turf in a much shorter time. In addition, the growth of the root mass makes the lawn more resistant to summer drought. A lawn with a high root mass also regenerates more quickly, which is an important characteristic for heavily used lawns (football pitches, playgrounds, etc.).

LAWN SEED MIXTURE RESTORE

"Restore" is a special mixture for reseeding of stagnant grass areas. It is designed for people who want to enjoy the green and lush lawn carpet in their home yard without much effort. Specially selected species of lawn grass are characterized by particularly fast germination and rooting, and special fertilizer "Accelerator" makes the "Restore" mixture unrivalled.

Sėklos LT range consists of various types of grass mixes with a specific purpose, i.e. seeds of fodder and lawn grass, sidental (green mature) and woody plants. The products stand out for the price and quality ratio. The packages are adapted and serve various customer needs: from small packaging of 0.1 kg for amateurs to 25 kg for professionals. The quality of seeds meets the EU requirements; the certified seeds have been tested and meet the requirements for variety identity and varietal purity.

LANGUAGES ON PACKAGING: LT / LV / EE / EN

LAWN SEED MIXTURE LILIPUT

The slowest growing and one of the most decorative lawn grass seed mixtures. A mixture is made up of small-leaved varieties of grass that form a thick and low 'carpet'. Lawns sown with the mixture Liliput are cut down twice less than other lawns.

EAN code	Name	Package, kg	Package size, cm			Bruto weight, kg	Minimal package, pcs.

NEW

MIXTURE FOR BLOSSOMING MEADOW/ FLOWER MEADOW

Special mixture that creates a year-round flowering meadow in your desired area. The mixture consists of over 50 different kinds of plants seeds. These include lawn, spice, fodder, legume and perennial and annual flower seeds. Colourful flowers will start to delight you in late spring and change each other even until autumn. This type of meadow is friendly to bees, butterflies and other insects that directly affect the pollination of other plants.

SMALL-LEAVED CLOVER EUROMIC

Two kinds of clover with extremely fine leaves and grass tall. This clover is added into lawn mixtures or is just used to create a white and dense 'carpet'. When using clover in lawn mixtures, the lawns should be fertilised with nitrogen fertilizers less frequently or in smaller quantities.

EAN code	Name	Package, kg	Package size, cm			Bruto weight, kg	Minimal package, pcs.

KENTUCKY BLUE GRASS BALIN

The Kentucky blue grass is the most decorative and expensive plant used in high-quality lawn mixtures. Planted individually, it creates an extremely good-looking 'carpet' made up of many very narrow stems. The Kentucky blue grass has deep green colour. This grass is good for landscaping small decorative areas or simply improving mixtures.

NEW

PERENNIAL RYEGRASS TEMPRANO

Perennial ryegrass is a fast and lush growing variety of grass widely used in lawn mixtures. This variety is good for fast and high-quality reseeded of treaded down areas or dead grass. The ryegrass can also be used for the areas that are often treated down or exploited for sports. It tolerates cold worse. Thus, in spring such areas are more likely to be reseeded. The ryegrass also needs more frequent watering.

			Height	Width	Depth		
4770168516601	TEMPRANO	1	33	23	2	1,1	10

RED FESCUE MAXIMA 1

Red fescue is a species of herbaceous plants widely used in various mixtures. Red fescue has long roots and high resistance in places where frequent soaking can be or the plants receive less sunlight. They germinate and grow more slowly but when well-established they are less prone to die.

EAN code	Name	Package, kg	Package size, cm			Bruto weight, kg	Minimal package, pcs.
			Height	Width	Depth		
4770168506466	MAXIMA 1	1	33	23	2	1,1	10

CLOVER FOR GRAZING RIVENDEL AND KRYNIA

A variety of tall clover for grazing or forage. White type of clover „Rivendel“. Red type of clover „Krynia“. White clover plants are slightly higher but the red ones last longer in the same habitat.

NEW

BEE PHACELIAS STALA

Decorative bee phacelias are grown by farmers for a variety of reasons. They are most often cultivated to stimulate honey extraction. The phacelia can also be grown as a green manure or a plant that helps to protect the soil from erosion. STALA is a medium-early variety with a vegetation period of 70 to 110 days, depending on weather conditions.

WHITE MUSTARD BRACO

White mustard is grown as sideral plants both outdoors and in greenhouses after harvesting potatoes, vegetables or annuals. Mustard can be sown throughout the season and its seeds germinate extremely fast. Thus, even after late harvesting, it is still possible to improve the soil. Its essential oils perfectly disinfect the soil.

The products of the Organic Way fertilizer line are intended for gardeners who protect the environment and appreciate naturalness. The unique composition was developed in collaboration with scientists, and only natural, organic materials are used. The Organic Way range consists of products necessary for the entire healthy vegetation period of the plant: from soil preparation to plant protection against pests and diseases. Liquid organic-mineral fertilizers and biostimulants have unique packaging and dispenser, which allow the buyer to immediately measure the required amount of fertilizer for the solution being prepared.

ORGANIC WAY LINE CONSISTS OF:

- organic fertilizers;
- organic-mineral fertilizers;
- single-component fertilizers;
- plant biostimulants;
- plant care products.

(LV/SE – for specific
products only)

ORGANIC FERTILIZERS

Organic fertilizers are a very effective tool for soil improvement. This type of fertilizer is slow-acting and plays an important role in microorganisms, which release the nutrients needed by the plant. Organic fertilizers could be produced from composted vegetable waste, but they were organ fertilizers made from animal waste.

GRANULATED CHICKEN MANURE

Organic complex fertilizer obtained by composting and drying chicken manure. This type of fertilizer has a high level of nitrogen, but they also contain phosphorus and potassium. The high nitrogen content ensures the rapid development of the green mass. Due to their composition, such fertilizers are considered universal.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth

4770168908116	GRANULATED CHICKEN MANURE	5 kg	45	35	6	5,200	1	120

GRANULATED FERMENTED CHICKEN MANURE

Organic fertilizer produced from chicken manure, but treated with a special fermentation technology. Naturally fermented manure has an extremely high content of phosphorus. Phosphorus is very important for the rapid and abundant development of roots and buds.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth

4770168908130	GRANULATED FERMENTED CHICKEN MANURE	10 kg	55	44	7	10,150	1	64

GRANULATED CATTLE MANURE

Organic complex fertilizer was obtained by composting and drying beef cattle manure. The diet of cattle is dominated by grass fodder, so this type of fertilizer is rich in organic matter, which increases the amount of humus and the overall microbiological activity of the soil.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168912212	GRANULATED CATTLE MANURE	5 kg	45	35	6	5,200	4	120

ECOLOGICAL COMPOST ACTIVATOR

Concentrated microbiological product intended for processing plant-derived materials and accelerating the decomposition and composting process. The product speeds up the composting process up to ten times, eliminates the bad smell of the compost pile and helps to produce high-quality organic fertilizers for your farm. The product is produced from patented microorganisms and has an ecological certificate.

The product is suitable for use in organic production.

The product has CERTIPAQ organic certification.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168924154	ECOLOGICAL COMPOST ACTIVATOR	1 l	21,5	12,5	5	0,840	7	560

FISH BONE FERTILIZER

Organic complex fertilizers are made from composted fish residues. This type of fertilizer has high levels of potassium and phosphorus, which will help the plant to take root quickly and have enough nutrients to form a green mass. Nitrogen in this fertilizer is in an organic form, so it is released little by little. This leaches it out of the soil more slowly and using a larger amount of fertilizer reduces the risk of burning the plant.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168912236	FISH BONE FERTILIZER	2 kg	15	24	15,5	2,500	1	200

BONE MEAL MIX

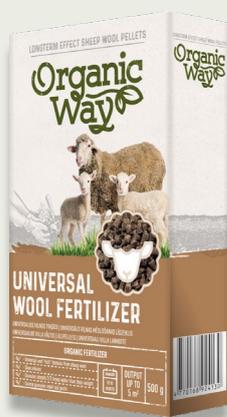

A fertiliser product for soil improvement and for feeding different types of plants. The fertiliser product is an excellent source of phosphorus (P) and calcium (Ca). These nutrients are important for the formation of plant cells and roots, for the processes of butonisation, flowering and photosynthesis, for the improvement of soil structure, for the revitalisation of soil micro-organisms, and for the increase of soil humus content. The fertiliser product is a blend of slow-release nutrients that provides long-lasting effects and benefits. It takes between 4 and 6 months for the material to be fully absorbed.

PFK 7. FERTILIZER PRODUCT MIX (PFK 1(A)(I) + PFK 2).

BULK ORGANIC FERTILIZERS WITH LIMING SUBSTANCE

NP (Ca, Mg) 2.5-30 (+42+1).

UNIVERSAL WOOL FERTILIZER

A fertilising product for soil improvement; nutrition of various types of plants during different cultivation stages; suitable for different types of soils and different cultivation conditions. It is also suitable for fertilising young plants, and plants grown in pots, raised beds, and containers. Universal and 'rich' formula ensures satisfaction of the key nutrition needs of plants, preservation or even increase of humus content, stimulation of microbiological soil activity. Fertiliser pellets hold water, increase porosity of soil. Fertilising product helps to restore neutral acidity degree. Thanks to its 'coarseness', wool pellets scare away molluscs and soil pests.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168924130	UNIVERSAL WOOL FERTILIZER	500 g	21,5	12,5	5	0,540	7	560

ONE-COMPONENT FERTILIZER

This type of fertilizer is intended to enrich the plant extremely rarely but mostly with unheard micro elements. These substances are not a direct source of nutrition, but without them the most important physiological processes do not take place in the plant. Such substances are usually very low in the soil or simply inaccessible to the plant.

KOPER – organic copper fertilizer. Copper is important to the plant because it is involved in many physiological processes, such as photosynthesis, synthesis of proteins and carbohydrates, evaporation of water, and most importantly, synthesis of lignin. The synthesis of lignin is especially important for the plant because lignin is like a barrier to the plant cell that protects it from the diseases. The higher its content, the more naturally the plant is resistant to pathogenic attempts to infect cells. Copper is a sanitizing element as well.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.

4770168911895	KOPER LIQUID COOPER FERTILIZER	0,500 l	19	13	6	0,600	6	1008

SILICON – liquid silicate (silicon fertilizer). Although silicon is the third most frequent element on Earth, it is insoluble and thus almost impossible for the plants to be absorbed, although it is also essential for the proper functioning of the plant. It is a building material, and thus its sufficient amount has a noticeable effect to make the shoots harder and thicker, as well as the leaves and roots stronger. A physically stronger plant is not only more resistant to external stress, such as wind or rain, but also harder and more robust plants are less attacked by pests. This feature means that a pest will always choose a plant that is easier to eat and this will help you naturally prevent from their increase in the garden.

BIOSTIMULATORS

The Organic Way product line offers biostimulators for plants and soils made from vermicompost or sapropel obtained from the materials extracted in Lithuania. Products are made from organic material.

SAPROPEL is a particularly nutritious layer of sludge that was formed in Lithuanian lakes tens of thousands of years ago. It has been used for skin beauty treatments for many years and now it can also be applied for plant growing. Although it is not rich in primary nutrients, it is extremely enriched in minerals and phytoactive components that directly stimulate the physiological properties of the plant. Sapropel also has a positive effect on the harvest and its quality.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.

*Bottles can be made from recycled plastic

VERMICOMPOST based biostimulants are made from a well-known and widely-used California earthworm compost. This compost is rich in humus which is a key component of a healthy soil. With each harvest, the amount of biohumus in the soil decreases and it is extremely difficult to restore it. This is why the amount of biocomponent in the soil should be maintained to protect it. Biohumus products should be used for the soil care.

FULVO – 100% natural concentrate of bioactive fulvic acids and micronutrients derived from young humates. Fulvic acids are a natural source of fertility and health for any plant. The product binds to nutrients and helps them to enter plant cells much more efficiently. They also increase the microbiological activity of the soil and the rate of compost formation. Supplemental substances and minerals provide the plant with a complete nutrition and ability to unfold its full genetic potential. The extract has been obtained not by using chemicals but water to ensure the highest quality and purity of the product.

ORGANIC AND MINERAL FERTILIZERS

Organic and mineral fertilizers are fertilizers used to meet all the basic nutritional needs of plants, to supplement the soil with organic substances and stimulate its microbiological activity. Farmers have long known that only healthy soil can produce a healthy and abundant harvest. Organic substances are obtained from high-quality composted chicken manure. This type of fertilizer works slowly and is rich in organic substances. Mineral fertilizers work quickly and feed a plant immediately. The combination of both fertilizers ensures that you will not only get a rich harvest but also take care of the health of both your own and of the soil. Organic Way offers both liquid and granulated fertilizers in different types for the garden.

PLANT CARE PRODUCTS

Plant care products are designed to prevent harmful effects on the environment in the home and garden.

POTASSIUM SOAP is a concentrated solution and a ready-to-use mixture. Potassium soap is a great product known for many years which can be used not only for washing clothes but also to help in growing any kinds of plants. It is a completely natural product that can be used to wash garden tools and other equipment to prevent contamination of diseased plants, and it can also help to get rid of pests. With this type of protection, the harvest stays healthy and undamaged by harmful chemicals.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.

4770168905061	POTASSIUM SOAP "GREEN" (concentrate)	0,500 l	24,5	10,5	5,5	0,600	10	560
4770168905078	POTASSIUM SOAP "GREEN" (ready to use)	0,500 l	26,5	11	5,5	0,600	10	560

DIATOMACEOUS EARTH is amorphous silicon extracted from sludge. This sludge was formed many hundred thousand years ago from the diatoms of microscopic creatures. Their shells consisted almost exclusively of silicon which decomposed to many small sharp edges. Because of this property pests cannot tolerate diatomaceous earth. This is the most natural way to protect your garden and even your home from their attacks. This type of products is used by farmers even to protect chickens from fleas. It is also important that diatomaceous earth is non-toxic and can be used even for food storage.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.

4770168905054	DIATOMIC	0,200 kg	20	6,5	6,5	0,250	12	960

THE RANGE OF AGRONOM FERTILIZERS OFFERS A WIDE VARIETY OF PRODUCTS COVERING THE MAIN ASPECTS OF FERTILISATION:

- all fertilisation areas (field, balcony, greenhouse, room space);
- various purposes of fertilisation (soil, vegetables, flowers, garden, ornamental plants, and lawns);
- different forms of fertilizers (granules, soluble crystals, liquid);
- main fertilizer compositions (NPK complex, compound, and single-component).

AVAILABLE IN DIFFERENT VOLUMES:

liquid – 0,250 - 1 l; bulk – 0,150 - 10 kg

All packages are attractively designed with comprehensive information presented on them, which will also be useful to beginning gardeners. The informative icons on the packaging help to quickly select the required fertilizer, find out the yield, and calculate the cost and time of fertilisation.

LANGUAGES ON PACKAGING:

EN, LT, LV, EE

MINERAL GRANULATED FERTILIZERS

UNIVERSAL FERTILIZER

Granulated chlorine-free complex fertilizer for garden (greenhouse) soil, flowers, garden and ornamental plants.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 12-11-18 (+2,7+20)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911512	UNIVERSAL FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

TOMATO PLANT AND VEGETABLE FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing vegetable garden soil (greenhouse soil), vegetable seedlings, outdoor and greenhouse vegetables, potato.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 11-10,5-21 (+2,6+25)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911529	TOMATO PLANT AND VEGETABLE FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

STRATWBERRIES AND FRUIT BUSHES FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing seedlings and planting stock of garden plants, strawberries and fragaria, berry plants, fruit bushes and trees.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 12-12-17 (+2+35)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911604	STRATWBERRIES AND FRUIT BUSHES FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

BLUEBERRIES (VACCINIUM) AND ERICACEAE FAMILY PLANTS FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing acid soil plants such as blueberries (Vaccinium), cranberries, lingonberries and ericaceae family plants (rhododendrons, azaleas, hydrangeas, erica, heather)

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 8-11-22 (+4+29)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911581	BLUEBERRIES (VACCINIUM) AND ERICACEAE FAMILY PLANTS FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

FLOWER FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing flower seedlings, indoor, balcony and outdoor flowers, as well as flowering shrubs and green hedges formed of them.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 8-11-22 (+4+29)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911567	FLOWER FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

RHODODENDRON AND HYDRANGAEA FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing acidic soil plants (rhododendrons, azaleas, hydrangeas, ferns) and other ericaceae family plants (erica, heather.)

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 8-11-22 (+4+29)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911574	RHODODENDRON AND HYDRANGAEA FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

ROSE AND FLOWERING SHRUBS FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing seedlings and planting stock of ornamental plants, as well as perennial flowers, roses, flowering shrubs, other ornamental plants and green hedges formed of them.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 11-10,5-21 (+2,6+25)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911536	ROSE AND FLOWERING SHRUBS FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

CONIFERS AND EVERGREEN PLANTS FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing seedlings and planting stock of ornamental plants, conifers, evergreen leaved and flowering shrubs, green hedges formed of them, landscape plants.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 11-10,5-21 (+2,6+25)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911543	CONIFERS AND EVERGREEN PLANTS FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

GRAPE AND ACTINIDIA FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing grape, actinidia, other fruit bushes and trees.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 11-10,5-21 (+2,6+25)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911550	GRAPE AND ACTINIDIA FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

RASPBERRIES AND HONEYSUCKLE FERTILIZER

Granular chlorine-free complex fertilizer for fertilizing raspberries, blackberries, honeysuckle family plants, hazelnut trees, berry plants and berry bushes.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 12-12-17 (+2+35)+TE

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911598	RASPBERRIES AND HONEYSUCKLE FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

HYDRANGEA FERTILIZER

The fertilizer is intended to improve the soil and feed various types of acidic soil plants.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER NPK (Mg, S) 12-12-17 (+2+35)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168924031	HYDRANGEA FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

ORNAMENTAL GRASSES AND CLIMBING PLANTS FERTILIZER

Fertilisers are designed to improve the soil, feed a wide range of herbaceous perennial ornamental plants (sedges, silvergrass, fescue, reedgrass, hakone grass, moor grass, fountaingrass) and climbing plants (leather flowers, actinidias, ivy, virgin ivy, wisteria, common honeysuckle, roses, and hydrangeas) species.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER NPK (Mg, S) 8-11-22 (+4+29)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168924048	ORNAMENTAL GRASSES AND CLIMBING PLANTS FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

UNIVERSAL AUTUMN FERTILIZER

Granular complex fertilizers for garden soil, bulb flowers, perennial garden and ornamental plants, lawn fertilizing in autumn or early spring if not fertilized in autumn PFC 1(C)(I)(a)(ii): COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER. NPK (Ca, S) 3,5-10-20 (+16+25).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168926042	UNIVERSAL AUTUMN FERTILIZER	1 kg	21,5	12,5	5	1,037	7	560

UNIVERSAL FERTILIZER COMPLEX NPK 12-11-18

Granulated chlorine-free complex fertilizer for garden (greenhouse) soil, flowers, garden and ornamental plants.

EC FERTILIZER. Fertilizer type: B.1.1. NPK mineral fertilizer with magnesium, sulphur and trace elements (boron, iron, manganese, zinc). NPK (Mg, S) 12-11-18 (+2,7+20)+(B, Fe, Mn, Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911444	UNIVERSAL FERTILIZER COMPLEX NPK 12-11-18	4 kg	40	26	5	4,040	5	200
4770168911468	UNIVERSAL FERTILIZER COMPLEX NPK 12-11-18	10 kg	50	36	7	10,100	1	80

STRAWBERRY AND FRUIT BUSH FERTILIZER

Granulated chlorine-free complex fertilizer for garden plant shoots and saplings, strawberries, other berry plants and fruit bushes, fruit trees.

EC FERTILIZER. Fertilizer type: B.1.1. NPK mineral fertilizer with magnesium, sulphur and trace elements (boron, zinc)

NPK (Mg, S) 12-12-17 (+2+35)+(B, Zn)

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911352	STRAWBERRY AND FRUIT BUSH FERTILIZER	2 kg	31	21	4	2,025	8	480
4770168911437	STRAWBERRY AND FRUIT BUSH FERTILIZER *coming in 2024	4 kg	40	26	5	4,040	5	200

UNIVERSAL FERTILIZER NPK 7-20-28

Granulated complex fertilizer for fertilizing garden soil, vegetables, garden and ornamental plants, lawns.

EC FERTILIZER. Fertilizer type: B.1.1. NPK mineral fertilizer with magnesium, sulphur and trace elements (boron, iron, manganese, zinc)
NPK (Mg, S) 7-20-28 (+2+7,5)+(B, Fe, Mn, Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911383	UNIVERSAL FERTILIZER	2 kg	31	21	4	2,025	8	480

UNIVERSAL FERTILIZER NPK 12-11-18

Granulated chlorine-free complex fertilizer for garden (greenhouse) soil, flowers, garden and ornamental plants.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 12-11-18 (+2,7+20)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911376	UNIVERSAL FERTILIZER NPK 12-11-18	2 kg	31	21	4	2,025	8	480

VEGETABLE AND POTATO FERTILIZER

Granulated complex fertilizer for outdoor vegetables.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (Mg, S) 12-12-17 (+2+35)+TE

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911390	VEGETABLE AND POTATO FERTILIZER	2 kg	31	21	4	2,025	8	480
4770168911710	VEGETABLE AND POTATO FERTILIZER	4 kg	40	26	5	4,040	5	200
4770168911789	VEGETABLE AND POTATO FERTILIZER	10 kg	50	36	7	10,100	1	80

CONIFERS AND EVERGREEN PLANTS FERTILIZER

The fertilizer is intended to improve the soil and feed various types of decorative plants

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER NPK (Mg, S) 12-12-17 (+2+35)+TE.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168924109	CONIFERS AND EVERGREEN PLANTS FERTILIZER	2 kg	31	21	4	2,025	8	480
4770168924116	CONIFERS AND EVERGREEN PLANTS FERTILIZER	4 kg	40	26	5	4,040	5	200

MOSSY LAWN FERTILIZER

Granular complex fertilizers for fertilizing mossy lawns.

PFK 1(C)(I)(a)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILIZER.

NPK (Mg,S) 7-5-8 (4,5:36)+Fe.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911451	MOSSY LAWN FERTILIZER	4 kg	40	26	5	4,040	5	200
4770168911475	MOSSY LAWN FERTILIZER	10 kg	50	36	7	10,100	1	80

LAWN FERTILIZER

Granular compound fertilizer for lawns and landscaping plants.

PFC 1(C)(I)(a)(ii) COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER.

NPK (S) 18-8-8 (+35).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911697	LAWN FERTILIZER	4 kg	40	26	5	4,040	5	200
4770168911499	LAWN FERTILIZER	10 kg	50	36	7	10,100	1	80

UNIVERSAL AUTUMN FERTILIZER

Granular complex fertilizers for garden soil, bulb flowers, perennial garden and ornamental plants, lawn fertilizing in autumn or early spring if not fertilized in autumn.

PFC 1(C)(I)(a)(ii): COMPOUND SOLID INORGANIC MACRONUTRIENT FERTILISER. NPK (Ca, S) 3,5-10-20 (+16+25).

SOIL ACIDIFYING AGENT (AMMONIUM SULFATE)

Granular concentrated nitrogen fertilizers are intended for fertilizing field plants and acidifying the soil. Not suitable for fertilizing legumes, including clover. Changes the color of pink hydrangeas to blue. PFC 1(C)(I)(a)(i): STRAIGHT SOLID INORGANIC MACRONUTRIENT FERTILISER. N (S) 21 (+60).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911369	SOIL ACIDIFYING AGENT (AMMONIUM SULFATE)	2 kg	31	21	4	2,025	8	480

POTASSIUM MAGNESIUM

Universal potassium and magnesium fertilizers are intended for improving the soil and feeding various types of plants PFC 1(C)(I)(a)(i): STRAIGHT SOLID INORGANIC MACRONEMIST FERTILIZERS K (Mg,S) 30 (+10+44).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168924093	POTASSIUM MAGNESIUM	2 kg	31	21	4	2,025	8	480

GRANULATED SUPERPHOSPHATE

Granulated phosphate fertilizer for main spring and autumn fertilising of plants at the beginning of and during active vegetative stage.

PFC 1(C)(I)(a)(i): STRAIGHT SOLID INORGANIC MACRONUTRIENT FERTILISER P (Ca, S) 19 (+31+31)

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911420	GRANULATED SUPERPHOSPHATE	4 kg	40	26	5	4,040	5	200

MELIORANT

Lime granules for putrefying, vegetable garden, greenhouse and garden soil, fertilizing outdoor vegetables, flowers and garden or ornamental plants and lawns..

EC LIME FERTILIZER. Fertilizer type: G1b natural limestone – high-quality limestone – granulated.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168911482	GRANULATED LIME	10 kg	50	36	7	10,100	1	80

Schultz Garden fertilizers offer high quality and fall into the high price category. Designed by professionals, these fertilizers are highly concentrated. As a result, these fertilizers are usually preferred by growers who want to ensure the best results. The range of fertilizers includes the main plant growing groups: ornamental plants, flowers, vegetables, berries. Two types of fertilizers are available: water-soluble and liquid. The fertilizers are packaged in small, colourful, and eye-catching plastic packages.

**THE SCHULTZ GARDEN LINE
CONSISTS OF 19 PRODUCTS.**

WATER SOLUBLE FERTILIZERS

UNIVERSAL FERTILIZER

Balanced, top quality soluble fertilizer with all the macro- and microelements needed by plants. For fertilizing all plants: flowers, roses, vegetables, trees, shrubs, lawns and all other plants in the garden, orchard, greenhouse or home. NPK fertilizers NPK 18-18-18 + 3MgO + TE (B + Cu + Fe + Mn + Mo + Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4779030510228	UNIVERSAL FERTILIZER	0,350 kg	11,5	7	6	0,400	12	1800
4779030510235	UNIVERSAL FERTILIZER	0,900 kg	12,5	10,5	8,5	1	6	768

BLOOMING PLANT FERTILIZER

Balanced top quality soluble fertilizer for flowering plants, all flowering and fruit ripening plants. Promotes faster and abundant flowering, healthy and compact growth, flower brightness, color saturation, strengthens plant roots. NPK fertilizers NPK 8-12-35 + 5MgO + TE (B + Cu + Fe + Mn + Mo + Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4779030510242	BLOOMING PLANT FERTILIZER	0,350 kg	11,5	7	6	0,400	12	1800
4779030510259	BLOOMING PLANT FERTILIZER	0,900 kg	12,5	10,5	8,5	1	6	768

ORCHID FERTILIZER

Balanced top quality soluble fertilizer with the necessary trace elements for all types of orchids and epiphytes. Promotes flowering, enriches colors, accelerates overall growth, develops a strong root system and maintains the beauty of orchids and epiphytes for longer.

NPK fertilizers NPK 18-27-18 + 2MgO + TE (B + Cu + Fe + Mn + Mo + Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4779030510327	ORCHID FERTILIZER	0,350 kg	11,5	7	6	0,400	12	1800

TRANSPLANT STIMULATOR

Dissolved crystalline fertilizer promotes abundant growth of new roots, reduces transplant shock, helps plants to take root, and promotes their continued healthy growth. Used for transplanting all indoor and outdoor plants.

NPK fertilizers NPK 10-52-10 + 1MgO + TE
(B + Cu + Fe + Mn + Mo + Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4779030510396	TRANSPLANT STIMULATOR	0,900 kg	12,5	10,5	8,5	1	6	768

ACID LOVING PLANTS FERTILIZER

Soluble fertilizers are specially designed for all plants that like acidic and more acidic soils and do not tolerate hard water (eric, evergreen and coniferous). These fertilizers acidify the water, so the plants successfully absorb all the nutrients intended for them.

NPK fertilizers NPK 12-10-11 + 4.5MgO + TE
(B + Cu + Fe + Mn + Mo + Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4779030510266	ACID FERTILIZER	0,350 kg	11,5	7	6	0,400	12	1800
4779030510273	ACID FERTILIZER	0,900 kg	12,5	10,5	8,5	1	6	768

TOMATO AND VEGETABLE FERTILIZER

Perfectly balanced top quality soluble fertilizer specially formulated for tomatoes and all vegetables. Promotes rapid and full growth, abundant flowering, faster fruit growth, improves taste.

NPK fertilizers NPK 15-7-32 + 3MgO + TE
(B + Cu + Fe + Mn + Mo + Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth

4779030510297	TOMATO AND VEGETABLE FERTILIZER	0,900 kg	12,5	10,5	8,5	1	6	768

ROSE FERTILIZER

Soluble fertilizers are intended for all roses and flowering flowers, flowering trees and shrubs. Promotes abundant flowering, growth, beautiful appearance, enriches colors and strengthens plant roots, helps to transplant the transplanted plants. Indispensable to feed onion flowers in the spring, during growth and flowering.

NPK fertilizers NPK 13-7-27 + 3MgO + TE
(B + Cu + Fe + Mn + Mo + Zn).

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.

PLANT CARE PRODUCTS

To achieve a high-quality and abundant yields, every gardener needs not only fertilizers, but also plant care products. Some plant care products are designed to provide primary stimulation of plant growth or protection against adverse environmental factors, while others are developed to protect plants from pests and diseases. The range consists of only the most necessary products, packed in optimal, attractive, and easily recognisable packaging.

STICK IT MECHANICAL PEST CONTROL MEASURE

The measure is intended for the control of insects and mites harmful to plants. Mechanically destroys red spider mites, aphids, scale insects, psyllids, whiteflies, thrips, damaging vegetables, flowers, fruit bushes and fruit trees, ornamental and landscape plants. The product is used as an alternative or an assisting measure to insecticides and / or acaricides.

PEAT SUBSTRATES & SOILS

Agronom is a line of products with deep traditions and valued by customers, now also offering high quality soils. The soils in the range are composed of natural substances; the composition was developed according to a special recipe. The range includes various types of peat, organic fertilizers, water absorption regulators, and stimulants. The attractive product packaging provides clear and relevant information to the buyers about the product and its use.

THE AGRONOM LINE CONSISTS OF 5 PRODUCTS.

LANGUAGES ON PACKAGING:

LT, LV, EE, EN

UNIVERSAL SOIL

Universal soil professionally prepared in accordance with a special recipe from organic and mineral materials for seed germination; for propagation and cultivation of seedlings (cuttings), growing and transplanting vegetables, flowers, ornamentals, fruit shrubs and fruit trees; arrangement of cemeteries; supplementing and improving the gardening soil; lawns and soil mulching, landscaping and plantations. The soil contains a balanced amount of nutrients, it is porous, absorbs water well, retains moisture, has no disease contagions. Macro- and microelements, humic and amino acids in the soil are easily absorbed, plants establish and grow faster, become more ornamental, their vitality and yield increases, plants need less additional fertilisation during the vegetation period.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth

SUBSTRATE FOR STRAWBERRY AND BERRY BUSHES

A mixture of light and dark peat supplemented with perlite, long-release organic fertilisers and rooting activator, for cultivation, transplanting and propagation of strawberry and wild strawberry plants and other berry bushes; supplementing and improving the gardening soil; for soil mulching. Organic fertiliser in the peat mixture provides nutrients to the plants for up to 3 months and the rooting activator helps strawberry plants or berry bush seedlings to establish and grow quicker and easier. Substrate additives increase plant vigour and fertility, with less need for additional fertilisation during the growing season.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.

B&S

Biohumus & Soil offers professionally developed growing media and soil improvers for gardeners who want to achieve higher yields. The products stand out not only for their attractive packaging, but also for their unique composition compared to other products on the market. The range consists only of the most popular products tried and tested by gardeners.

THE BIOHUMUS & SOIL LINE CONSISTS OF 16 PRODUCTS.

LANGUAGES ON PACKAGING: LT, LV, EE, EN, RU, DE, SE

ORGANIC COMPOST MULTIPURPOSE

Multipurpose mix of peat bog and cattle manure for replanting the sprouts, growing and replanting outdoor and greenhouse vegetables, flowers and other indoor plants, ornamental plants, berry bushes and fruit trees, arrangement of cemeteries, arrangement and planting of landscapes, improvement of light and heavy soil structure.

B&S

SOIL FOR BALCONY AND INDOOR FLOWERS, 16 l

Multipurpose mix of peat bog and cattle manure for propagation and growing flower seedlings, replanting and growing flowers, green and other indoor plants, for filling hanging and outdoor baskets, balcony trays, flowerbeds, full flower areas and rock gardens, improvement of light and heavy soil structure. Humidity retaining pellets in the mix increase its humidification properties, gradually releasing water and fertilizer, reducing fertilizer leaching from the soil and increasing the preservation of nutrients in the soil.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.
			Height	Width	Depth			
4770168904422	SOIL FOR BALCONY AND INDOOR FLOWERS	16 l	50	30	8	8,000	7	126

ORGANIC COMPOST FOR CEMETERIES, 20 l

Multipurpose mix of bog peat and cattle manure for arrangement and planting of cemeteries; for outdoor flower seedlings, bulbs, shoots, young plants, plantations; outdoor flowers, blooming shrubs, for growing and replanting of ornamental coniferous and evergreen plants, flower gardens, hedges and rock gardens; for lawn and soil mulching; supplementing and improving the gardening soil; other planting applications.

SOIL FOR HYDRANGEAS

A blend of natural peat and green compost, enriched with fertilizers, designed for the cultivation and transplanting of lacecap, bigleaf, mophead, and other varieties of hydrangeas; to supplement and improve planting soil; for soil mulching. The flowers of bigleaf hydrangeas respond to soil acidity: at a soil pH of 4.5, they acquire a blue colour; as the soil becomes more alkaline, at pH 7, the colour of the flowers turns pink. If the pH is higher (alkaline), plants can no longer absorb nutrients, leading to leaf yellowing, wilting and disrupted growth.

PLANT DRAINAGE SOIL

Drainage soil is used as a base layer at the bottom of the pot aimed at removing excess water and preventing the roots of the plant from getting soggy. This ensures sufficient ventilation and protects the plant from mould. Ceramsite grains can also be used to fill the surface of the pot. We recommend to fill 2-3 cm - it will not only be decorative but also protect the plant from drying out. Ceramsite stimulates plant growth, improves moisture and air circulation, maintains humidity and prevents mould from appearing on the soil surface.

HORSE MANURE COMPOST

Soil improver (fertilizer)

Manure compost, prepared as natural soil improvement material for substrates of plants, sprouts (seedlings, young plants), vegetables, flowers, garden and ornamental plants, and lawn.

Organic and microbiological substances in the composition of various organic matter provide looseness to soil and ensure long-term fertilising effect. Compost inserted into the soil releases the main nutrients required for plants – nitrogen, phosphorus, potassium and trace elements. If the soil contains a lot of clay, compost improves its structure and increases air permeability, while in sandy soils it retains moisture and restores degraded soils. Your plants fertilised with this compost will be more resistant to disease.

AGROPERLITE (PERLITE)

Agroperlite improves the structure of heavy soils. Perlite is a material of volcanic origin that expands from heat and becomes porous. Due to the properties of perlite, water, air and nutrients can be retained for as long as the plant needs them. Perlite accelerates seed germination, promotes root formation and growth, reduces transplant damage, protects plants from temperature fluctuations all day long, because it has low electrical conductivity, no nutrients and cannot replenish the soil with them, making it different from other biological additives.

EAN code	Name	Package	Package size, cm			Bruto weight, kg	Minimal package, pcs.	On pallet, pcs.

VERMICULITE

Soil improver used to enhance soil quality. It is incorporated into the soil or substrate for planting outdoor and greenhouse vegetables, flowers, and other indoor plants, ornamental plants, berry bushes, and fruit trees. Suitable for various plants in hydroponics.

Vermiculite retains moisture, protects against diseases, improves air circulation in the root zone, and fixes the nutrients for plant nutrition. The key characteristic of vermiculite is moisture retention in the soil, making it suitable for use as a soil conditioner. Vermiculite granules can absorb up to 3-4 times more water than own weight.

ORGANIC PRODUCTS

The healthier the soil, the more fertile it is. Consequently, considering prevailing trends and customer requirements, we collaborated with scientists to formulate organic compost designed to enhance soil quality and facilitate the germination and cultivation of a variety of vegetable and flower seeds. Organic products not only enhance soil structure but also promote the augmentation of the humus layer and microbial activity.

THE ORGANIC WAY LINE INCLUDES

- 3 products.

ORGANIC COMPOST FOR HERBS AND VEGETABLES WITH PERLITE

A mixture of peat and vegetable compost from raised bogs, supplemented with perlite and fertilisers, to germinate seeds for herbs and vegetables; for production and transplanting of outdoor and greenhouse vegetables; for herb growing; supplementing and improving the gardening soil; for soil mulching. The macro- and micro-elements (humic and amino acids) in the compost are easily absorbed, the seedlings of herbs and vegetables grow and establish more quickly, their vitality and fertility increase, and the need for supplementary fertilisation is reduced during the growing season. The perlite contained in the compost is a volcanic material that traps moisture and increases air permeability.

**MULCH IS USED NOT ONLY TO DECORATE THE ENVIRONMENT,
BUT IS ALSO SUITABLE FOR THE FOLLOWING PURPOSES:**

- decorating green areas, garden beds, flower gardens or rock gardens;
- mulching perennial plants, vegetables;
- storing various root vegetables during winter;
- decorating graves;
- improving the soil and protecting it from adverse environmental factors.

The range consists of high-quality, coloured mulch made of wood chips, buckwheat husks, and pine bark.

COLOURED MULCH

Professionally made mulch for mulching plants, forming flower gardens, rock gardens, green areas, and decorating the environment. Available in red and brown colours. Mulch not only decorates the environment, but also helps maintain plant moisture and protects against weeds.

BUCKWHEAT HULL MULCH

Buckwheat hull mulch is made from buckwheat hull remaining after processing of buckwheat groats. Buyers appreciate not only the naturalness, but also the fact that this product transfers useful minerals to the plants and soil. Multi-purpose product: from decorating green areas and raised garden beds to mulching perennial plants, vegetables, roses and storing root vegetables during winter. Also suitable for decorating graves. Buckwheat hull mulch also effectively lightens the texture of heavy loam.

PLASTIC LAWN EDGES, BORDERS, AND TREE TRUNK PROTECTORS

These products are made of durable recycled plastic. They are flexible and durable, easy to adapt to various paving surfaces, easy to install. Plastic edges and borders are used to redesign deformed paving, frame stone paths, separate lawns and flower beds, and maintain graves. The products in the range stand out for their high-quality and affordable price.
